

SMART GUJARAT FOR NEW INDIA HACKATHON

Title :- Smart Street Light Management System.

From Map

S T A R T	Sensors will be ON and will detect the presence of the vehicle or obstacle.	If it detects the object, then light will be switched ON.	Once the light gets switched ON, based on the timer set it will be switched OFF automatically.	Simultaneously, the system can also be generated which will detect the speed of the vehicle and will work in accordance with that.	S T O P
